Two New Northern Lights Models Fill the Market Need for Clean, Reliable Power

Northern Lights, Inc. (NLI) is pleased to announce the release of two new models - the M944W3F and M944T3F.

Model	kW @ 1800 RPM/60 Hz*	Emissions Level
M944W3F	30	EPA Tier III
M944T3F	38 single phase 40 three phase	EPA Tier III

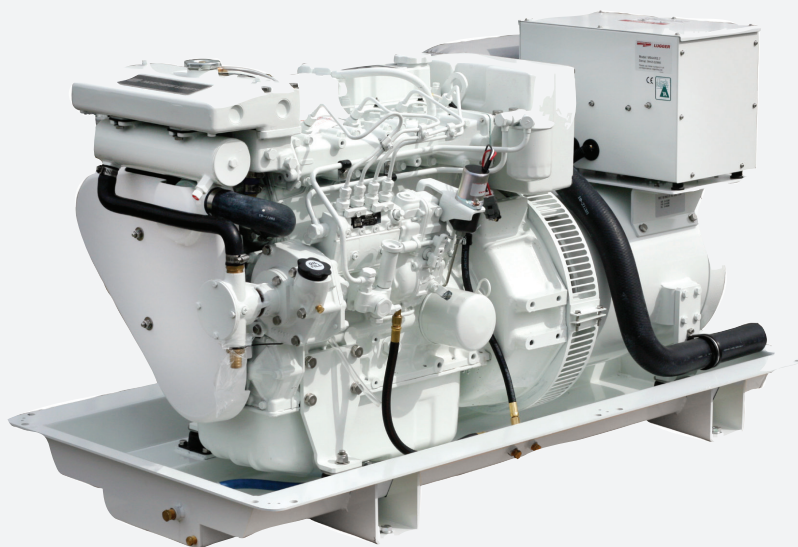

* Available models for non-US flagged vessels: M944T - 32kW @ 50 Hz and 38kW @ 60 Hz.
M944W3 - 26kW @ 50 Hz and 30kW @ 60 Hz

These new models represent the state of the art in marine power production, using an advanced pDPF system to reduce pollutants and ensure environmental compliance. Both models boast the Northern Lights quality features that the marketplace has come to rely on:

- Four cycle, 4 cylinder, liquid cooled overhead diesel base engine (turbo charged on M944T3F).
- Induction hardened, forged crankshaft with cross flow head for efficient breathing.
- Standard easy-to-service heat exchanger cooling, with keel cooling optional.
- Direct coupled generator with AVR for true 300% short circuit protection.

The sets will increase by only 4" in length to accommodate the wet exhaust elbow. Units will be available for delivery in September 2017.

Contact your Northern Lights representative or www.northern-lights.com for more information.
